

Lucy Tam

An innovator driven to deliver meaningful impact in day to day living, focusing on human-computer interaction in behavioural learning to strengthen individual agency.

CURRENT PROJECTS

Masters Solo Project: Reframing Education in a new era

Jan 2026 Ongoing

Design interventions exploring the preparation of the next generation for a workforce characterised by advanced technology and artificial intelligence.

SomethingOS: Reclaiming agency in smartphone usage.

IDE Masters Team Project Sep-Dec 2025, continued development.

Project lead in the development of an operating system framework tackling harmful behaviours associated with the attention economy which dominates modern life.

Differentiating from existing digital health products that focus on restriction, SomethingOS proposes new methods of smartphone interaction which inherently strengthen user agency, directly applying psychological principles regarding dopamine, habit-forming, and physical wellbeing towards interface design.

Project continuation aims to adapt the developed framework towards a product for the younger generation, aiming at replacing the 'first phone' in an emerging market for cognitive sustainability.

INDUSTRIAL AND WORK EXPERIENCE

Project Engineer at Revive+

Intern through Summer 2025 into ongoing part-time work.

Novel autoinjector system development at an established medical device start up working within InnovationRCA. CAD development, prototyping, testing protocols and integration of internal mechanisms. Involvement in patent work.

Mechanical Engineer at 3P Innovation

Industrial placement year August 2022-2023.

Client project work at a pharmaceutical manufacturing and automation consultancy at many stages from early concept, procurement, detail design for manufacture, and system testing. Lab work with active products (powders).

Internal NPD involvement with proposal work and market research, including networking within the Pharma Equipment market. Formal presentation and communication to clients.

EDUCATION

Innovation Design Engineering (MA, MSc)
Imperial College and Royal College of Art.

First Class Masters in Mechanical Engineering with Intercalated Year (MEng with Hons).
University of Warwick July 2024.

AWARDS

Current holder of an *Industrial Design Studentship* from the Royal Commission for the Exhibition of 1851.

iMechE Prize for Best Project 2024
(Awarded for role in *WORAD*).

WBS 'Engineers in Business' competition winner 2023 (Awarded for *AI-Recycle*).

PROFICIENCIES

Fluent English, conversational Cantonese.

Highly organised with an internal QMS.
Technical writing and communication,
Excel spreadsheet, inventory.

CAD: Fusion 360/ Autodesk Inventor.
Graphics: sketching/ Figma/ Illustrator.

ROLES

(2021-22) Warwick Engineering Society Design Officer.
(2022-23) Warwick Badminton Sponsorship Officer + Women's Team.
(2023-24) Warwick Sport Activator.
(2025-now) RCA Climbing Society Lead.
IDE Course Committee Member.
